

## How To Use Ghost-Off

GHOST-OFF is a safe, ready to use product designed to quickly restore weather exposed surfaces by easily removing oxidation. This heavily concentrated mix of new surfactant technologies is a simple 1-2-3 step process with amazing visual results. Fades "ghost" images of completely removed vinyl so vehicles are no longer haunted by the past. Also a great surface prep.

### Step by Step

#### 1. Thoroughly drench dry surface.

- Spraying preferred, pre-rinsing optional.. works best on cool wet surface

#### 2. Allow up to 1 minute dwell time.

- Agitate with a soft brush, sponge, etc.
- Product may dry quickly when used in hot-dry weather. Re-soak as needed.

#### 3. Wash off.

- Rinse thoroughly! Ghost-Off rinses free even in cold water. Watch for the oxidation running off (like in the lower left picture by the front tire!)

#### 4. Re-apply if needed.

- Not intended as a weekly wash!
- Even heavily oxidized surfaces rarely require a second round.

#### 5. Use caution! This product may dry skin.

- Use skin lotion to re-moisturize after thoroughly washing any exposed skin.

#### 6. May be used as a surface prep before applying graphics or re-painting
